About the Conference

During recent years, the concept of pedagogy has gained more attention than ever before in teaching and learning process of English. Because the pedagogical thought and framework in teaching English highlight the characteristics of multiculturalism, modernity, urbanism, migration of language learners from rural areas. This, in turn, defines its new borders and limitations compared to the deep-rooted traditional models of education. So there is a need for the creation of a broader epistemological structure of Pedagogy.

The conference aims to put forward the current trends in Teaching English Language and Literature by promoting research and highlighting new paradigms, thus improving the quality of teaching English. It is an ideal platform to learn from the experience of others. It helps to bring together academicians, researchers and scholars in the field of language and literature to share their innovative findings, inspire and develop newer methods of efficient Learning and Teaching.

Conference Objectives:

- To create interest on various techniques in teaching language and literature
- To make the participants conversant with emerging trends in Pedagogy
- To share knowledge and expertise to enhance the overall teaching skills
